JFrog Artifactory

Leveraging Application Automation as part of your Test Environment Management strategy aligning to the TEMMI #5; A core part of managing your IT & Test environments is the ability to streamline your operations by leveraging your favourite tools. With Enov8 you can integrate all your favourite development & test tools

through a single unified interface. A solution that allows you to connect your automation to your existing environment configuration items and have them invoked on demand. Just some of the many DevTest tools we can connect to:

- Jenkins
- Bamboo
- Travis CI

- Team City
- Cruise Control
- Artifactory
- Nexus
- UrbanCode
- Octopus Deploy
- Run Desk
- CA Nolio
- ALM
- Jira
- Selenium
- UFT
- JMeter
- Load Runner
