DATA AUTOMATION TEST ENVIRONMENT MANAGEMENT MATURITY INDEX

Leveraging Data Automation as part of your Test Environment Management strategy aligning to the [TEMMI #6](#).

A core part of managing your IT & Test environments is the management of your systems information & data and the streamlining of these operations. This can be achieved by leveraging “best of breed” tools that will support key data activities like Fabrication, Extraction, Transformation (Subsetting & Privatization) and Load.

With Enov8 you can integrate seamlessly to all your favourite information & data tools through our single unified interface. A solution that allows you to connect your data automation & methods to your existing environment configuration items and have them scheduled or invoked on demand.

Just some of the many Data tools we can integrate with:

- CA Grid Tools
- Compuware File Aid
- Delphix Engine
- Enov8 DataView
- Informatica
- IBM DataStage & Optim
- SAS Data Integration Studio
- SAP TDMS
- SharePoint
- Talend
- Wiki
